MATRON :

MISS OLIVE M. BROWN.

ASSISTANT MATRONS :

MRS. HARRIETT CHALFANT,

MRS. EMMA MUELLER

REPORT OF THE TRUSTEES.

To his Excellency RICHARD M. BISHOP, *Governor of Ohio* :

DEAR SIR: The Trustees of the Institution for the Blind have the pleasure of presenting to you the forty-third annual report, accompanied by the reports of the officers of the institution.

By this report it will be seen that the interests and education of the blind, confided to and cared for by the State of Ohio, have been all the most exacting and sanguine could hope for or expect.

No discord or strife has entered into its walls during the past year, and the official management has been ably conducted by Superintendent Smead and Steward McCarty, assisted by their subordinate officers.

Important improvements have been made in the past year, particularly the windows put in the basement of the building, whereby ventilation is rendered more complete, and their healthful influence has already been made manifest by a decrease of sickness.

The household necessities were partly supplied by the small allowance granted for that purpose. The beds and bedding have been renewed, and a number of rooms that were sadly out of repair have been plastered, calcimined, and made more comfortable.

An appropriation was asked for, to be used in painting and repairing the cornice, cupolas, tin roofing, caps, and leaking gutters; also other parts of the building that are decaying rapidly for want of paint and repairs. The attention of the last Legislature was asked, in the last report, to the fact that the State had lost already by not heeding the matter, and again we urge the necessity of making a special appropriation to repair and keep in preservation the useful edifice of which every Ohioan is justly proud.

The attention of the State is also called to the fact that the beautiful plat of ground, containing some three acres, on the north side of, and jutting up closely to the institution, is the property of Mr. Geo. M. Parsons, who has, so far, kindly rented it for a nominal sum to the State. The grounds of the institution are incomplete without it. The institution now owns some five acres on Town street that could be sold and the proceeds applied to the purchase of the Parsons lot. Previous reports have urged the importance of securing this land while it may be had. It is hoped that the Legislature will give this matter attention at once.

The number of pupils at present in the institution is 182. Each ensuing year brings an increased number of pupils, with additional expenses. Many parents, in years past, were not aware that the State, in her generosity, furnished all things necessary to the pupils free, where the parents were unable, by reason of poverty, to educate and clothe them; or feared, perhaps, their sightless darlings would be harshly dealt with, and miss the tenderness and sympathy extended to them while at home. Now, it is generally known that the institution is free, and the officers and teachers kind and thoughtful to the dear ones confided to their care, and, as past experiments have proven, that the pupils in this institution have advanced, comparatively, as rapidly in education as seeing children in the best schools in the State.

We hope the necessary appropriations will be granted, to provide for the increasing wants of the institution.

Mr. H. Hauenstein, foreman of the broom shop, reports that over fifty pupils are now engaged in learning to make brooms, mattresses, and seat chairs: a large number of them learn very readily, and soon will be able to earn their own living. Mr. Hauenstein has been engaged in teaching to make the above-named articles, in different institutions for blind, for over forty years. He is a faithful officer, and takes great pains to teach his pupils in the respective branches of handicraft he oversees.

The able and interesting report of G. L. Smead, Superintendent of this institution, shows him to be thoroughly acquainted with the duties of Superintendent. As a teacher, he has experience and progressive ideas; his uniform kindness, firmness, and the interest he takes in promoting the education and welfare of the blind, prove conclusively that, in an institution of this kind, he can have but few equals as a public instructor.

We call *particular attention* to the report of Mr. John McCarty, Steward of this institution, who exhibits, in his report, that he has closely watched the interests of the department that he has been intrusted with. His economical course of expenditures, and regard for the wants and comfort of those he has been compelled to care for, have made him many friends, both in and out of the institution.

We call attention also to the report of Dr. J. R. Flowers, physician in charge of this institution, who has been very attentive in the discharge of his duties, and has reason to feel justly proud that in the time he has been connected with the institution his skillful treatment of the sick and gentlemanly bearing towards the inmates has been recognized by the Board.

But two contracts have been entered into for the ensuing year, viz., milk, to be delivered at the institution, 12½ cents per gallon, and meats

from 6 to 9 cents per pound. No contract has been made, as yet, for coal, prices asked by dealers having been considered too high by the Board.

We respectfully ask for the following appropriations for the fiscal year 1880:

Current expenses	\$43,000 00
Salaries	12,000 00
Repairs and improvements	4,000 00
Furniture	1,500 00
Improving grounds	525 00
Musical instruments and apparatus	1,500 00
Additional land (Parsons lot)	25,000 00
	<hr/>
	\$87,525 00

Respectfully submitted,

JOS. FALKENBACH,
W. R. WING,
HARMON AUSTIN,
C. BLASER,
S. D. HOUP, *Trustees.*

REPORT OF THE SUPERINTENDENT.

Gentlemen of the Board of Trustees :

It is my duty again to report to you the condition and progress of the school for another term. There has been nothing very marked to characterize the common routine of school life. Our work, to be efficient, must be steady and persistent, free from all unnecessary excitement, so that our pupils may calmly and quietly attend to their duties. It will often be found to be true, that the term which has had nothing special to distinguish its course, has been the most fruitful in good results.

The two examinations of the school showed faithful labor and good progress on the part of the pupils, and efficient instruction on the part of the teachers.

The following tables will show matters of interest concerning the number of pupils, causes of blindness, etc. :

RECORD OF LAST TERM.

New pupils entered—males, 35; females, 16; total.....	51
Average attendance	165
Number enrolled—males, 110; females, 92; total.....	202

RECORD FOR THE FISCAL YEAR ENDING NOVEMBER 15.

New pupils—males, 32; females, 22; total	54
Average attendance	173
Enrolled—males, 128; females, 115; total	243

RECORD OF THIS TERM TO NOVEMBER 15.

New pupils—males, 17; females, 17; total	34
Average attendance	170
Enrolled—males, 94; females, 88; total	182
In attendance November 15—males, 91; females, 87; total.....	178

AVERAGE AGE, ETC., OF THOSE PRESENT NOVEMBER 15.

Average age of males.....	17
“ females.....	16½
“ whole school	16 5-6
Under twenty-one years of age	148
Over twenty-one years of age.....	30
	178

The following are the causes of blindness of the pupils entered this term, so far as known :

Granulation of lids	1
Leucerna.....	1
Cataract	3
Choroido-retinitis	1
Congenital cases	3
Ulceration of cornea	1
Conjunctivitis.....	2
Measles	2
Injury	4
Ophthalmic neonatorum	3
Amaurosis	2
Inflammation	5
Spotted fever	1
Unknown	5
	— 34
Of the above number—	
Totally blind.....	15
Partially blind	19
	— 34

The following table will show how our pupils are employed every day :

Arithmetic	166
Reading	95
Spelling	113
Writing.....	38
Point writing	12
Geography	37
Grammar	36
Algebra	14
Natural Philosophy.....	26
History of the United States.....	30
General History	11
Mental Science	17
Latin	6
Geometry	5
Kindergarten	38
Vocal music.....	107
Thorough bass	40
Orchestra	21
Piano practice	124
Cabinet organ.....	26
Large organ.....	11
Violin, besides orchestra.....	14
Wind instruments.....	7
Cane seating	50
Broom making	52

Hand sewing	62
Machine sewing	16
Braid-work	53
Crochet-work	13
Hand knitting	
Machine knitting	7

By the catalogue it will be seen that the different counties are represented as follows:

Counties.	No.	Counties.	No.
Adams	2	Licking	2
Allen	1	Logan	1
Ashtabula		Lorain	3
Ashland	5	Lucas	5
Aurora		Madison	3
Auglaize		Mahoning	4
Belmont		Marion	3
Brown	1	Medina	1
Butler	2	Meigs	1
Carroll	2	Mercer	2
Champaign	2	Miami	
Clarke	2	Monroe	
Clermont	2	Montgomery	5
Clinton	1	Morgan	
Columbiana	1	Morrow	1
Coshocton	4	Muskingum	3
Crawford	3	Noble	1
Cuyahoga	16	Ottawa	1
Darke		Paulding	1
Defiance		Perry	6
Delaware	1	Pickaway	5
Erie	1	Pike	
Fairfield	3	Portage	1
Fayette	2	Preble	
Franklin	21	Putnam	1
Fulton	3	Richland	1
Gallia	2	Ross	3
Geauga		Sandusky	3
Greene	2	Scioto	2
Guernsey	3	Seneca	5
Hamilton	29	Shelby	2
Hancock	3	Stark	5
Hardin	4	Summit	
Harrison	1	Tumbull	2
Henry	1	Tuscarawas	2
Highland	1	Union	
Hocking	2	Van Wert	
Holmes	1	Vinton	
Huron	2	Warren	3
Jackson		Washington	6
Jefferson	6	Wayne	2
Knox	4	Williams	1
Lake	1	Wood	5
Lawrence	4	Wyandot	2

By the foregoing table it will be seen that the average attendance for the fiscal year has been increased from 156 last year to 173 this year, and that the number present November 15 is greater by 8 than last year.

while the number enrolled is 243, 18 more than the previous year. The number of new pupils admitted last year was 48, this year 54.

Seventy counties were represented by pupils in the institution, leaving only eighteen unrepresented.

The changes in the corps of officers and teachers are well known to you, but it is well to put them upon record in the annual report.

Mrs. Heyl, who has been so long identified with the institution, resigned near the close of the term to take the care of her aged mother. She was an efficient and faithful teacher, whose long experience has been of great value to the institution. She was succeeded for the remainder of the term by Miss Bell Lloyd of Napoleon, Ohio, and at the beginning of this term by Miss Hattie Dunbar, of Mt. Vernon, Ohio.

Mr. Gamble, who has performed efficient work in the institution for three years, was succeeded by Mr. Henry Snyder, of Springfield, Ohio.

Miss Mattie McKibben, who has been a mother to the little girls for so many years, has accepted a position in the Wisconsin institution, at Janesville, and was succeeded, September 15, by Mrs. Emma Mueller, of Columbus.

Mrs. Harriet Chalfant has been appointed Assistant Matron on the boys' side.

Miss Lena Ernst and Miss Mary Loeb, pupils last term, have been appointed assistant teachers in the music department.

One death occurred during last term. Herbert March died December 31, of typhoid fever. He was a young man of superior ability, of good character, and of untiring perseverance in his studies.

One fatal case of typhoid fever occurred in August, in consequence of which it was thought best to postpone the commencement of the term till October 1. There were no further cases of the disease, however, and the health of the school, up to November 15, has been excellent.

The kindergarten, under the able management of Miss Redick, has been in successful operation during the year, and has been all it promised for the development of our children in just the points that blind children need.

The tuning department, which was organized last term, was quite successful, considering the time and the facilities at hand.

At least two of our young men, after a year's practice, earned enough during vacation to support themselves. This we consider very good progress, seeing that usually a larger time is needed to acquire the necessary skill.

Our music department is very important in the education of the blind, Music is to the blind a source of continued pleasure, and a means of livelihood to many.

Our musical instruments need constant repairs and renewal. We have about one hundred and twenty-four pupils practicing the piano. We have thirteen pianos for that number, and these instruments are used from six to thirteen hours a day. No piano will endure such constant use, and not get out of tune and out of repair. Either we must be constantly tuning and repairing, or much of the time the instruments will be unfit to use. The same is true of the organs and other instruments. We need now several new pianos and at least two new cabinet organs to meet the wants of the school. We respectfully call attention to this matter, and ask an adequate appropriation to meet the wants of the music department.

June, 1880, is the time to which many of our former pupils are looking in anticipation of a re-union, and, with your permission, I will at the proper time issue invitations for the occasion.

At the session of Congress last winter, the sum of two hundred and fifty thousand dollars was set apart as a perpetual fund for the purpose of aiding the education of the blind in the United States of America, through the American Printing House for the Blind. The income upon this sum is to be expended by the Trustees of the American Printing House in manufacturing and furnishing tangible books and apparatus adapted to the blind. The books and apparatus so prepared are to be distributed to each institution in the United States according to the number of pupils. We have already received one installment of our quota for this year, and expect more as soon as ready. We hope now to be better furnished with maps and other apparatus specially adapted to the blind. That apparatus which the blind can appreciate is needed in their education, is obvious. If the seeing, with the full use of all their senses, need maps and other apparatus to illustrate their studies, much more do those deprived of sight need helps that may appeal to hearing and touch, and make clear what otherwise would be unintelligible. Human beings in full health, and having all their senses complete, have the means of improving the opportunities of education which they may enjoy, so that with proper diligence they can secure a full and harmonious development of all their powers of mind and body. But it is not so with those deprived of one or more senses. As trees sometimes, because of adverse winds or deprivation of sun-light, have a one-sided growth, so those deprived of sight will lack the development which sight would give, unless measures are taken to call out the energies by appealing to the senses still remaining. As one unaccustomed to the blind contemplates their condition, the difficulty of moving from place to place, and of attending to the usual manual operations of life, strikes him most forcibly and excites his pity.

And this difficulty is a great hindrance to physical development. There is a lack of that free and full muscular movement so essential to full health and vigor; and as a healthy body is necessary to the best activity and development of the mind, the blind are very likely to be hindered in their mental growth by the conditions of body to which they are subjected.

And then, too, this physical helplessness makes the blind dependent upon others for assistance in going about and in performing the most common duties; and physical dependence tends to produce mental dependence. If a child is accustomed from infancy to depend upon others for the satisfying of his physical wants, he will be in danger of growing up depending upon others to do his thinking for him, and thus lose the mental discipline of vigorous, independent thought. The feeling of dependence will also have its effect upon character. If one is dependent physically and mentally, he will be likely to lack moral stamina; will be under the influence of others in matters of right and wrong, and will go astray if that influence is pernicious.

Also, there is in this very condition a want of moral stimulus. If one feels as though he were of but little account in the world, he may be led to think that it makes but little difference how he behaves, and so fail to come up to what ought to be his moral standard. And then the tendency on the part of many people to excuse in a person because he is blind conduct which would not be tolerated in a seeing person, has its influence to keep some blind persons from meeting the full measure of their moral responsibility.

When we come to a regular course of school education, we meet difficulties in the instruction of the blind which none can appreciate except the blind themselves, and those who work with them daily in the school-room.

Sight is the most important educational sense. The student needs it in the study of lessons from text-books, in writing, in the use of maps and other apparatus. He uses sight at every turn in the school-room while pursuing his studies, and outside when engaged in the games and sports of childhood. By sight he observes the behavior and example of those around him, and learns to copy proper and becoming conduct and to avoid unpleasant and disgusting habits. And by all this use of sight the seeing child is being educated. The blind are deprived of the means of education which sight affords, and of the stimulus to mental action which it furnishes. The problem for our teachers to solve is, how to meet the wants of the blind child in its lack of the means of physical, mental, and moral improvement, and the want of stimulus thereto.

Hearing and touch are the senses upon which we must depend for the most part to make up for the want of sight. Hence tangible books and apparatus, music and musical instruments, and the human voice, must constantly be called into requisition in the education of the blind.

Through these two senses, by oral instruction, by illustrations adapted to hearing and touch, by tangible writing and printing, by apparatus which the blind can appreciate, by the harmonies of music, the teacher must reach the mind of the blind child, arouse his energies, inspire him with confidence, and show him what he can do for himself both physically and mentally.

It is important that the memory of a blind person should be ready and retentive, for this faculty must be his book, to which he may refer with certainty for whatever knowledge he needs in practical life. But memory should not be developed at the expense of the understanding and the reasoning powers. There is danger of this if the scholar always learns his lesson word for word as the teacher gives it to him, and does nothing more. It is a part of the teacher's duty to see that the pupil understands what is taught, and that he is not left with a mere collection of words of whose meaning he has no adequate idea. The pupil should not be excused from thinking because he is blind, but by every means should be encouraged to think out completely every item of instruction given.

The use of touch, with tangible apparatus and books in raised print, is very important, and this sense should be carefully trained for the use of the mind. But in school and in after life the blind person will depend most upon hearing for his enjoyment, for his acquisition of knowledge, and for the discipline of his higher intellectual faculties. Hence, while we would avail ourselves of every possible help from all the senses, we must depend chiefly upon oral instruction and upon the sense of hearing in a course of education adapted to the blind.

Every appropriate means should be used to foster in the blind child a sense of moral responsibility. He should be excused for no misdemeanor because he is blind. Of course mistakes and accidents will occur with those deprived of sight, because of their infirmity, and these should be carefully distinguished from careless or willful wrong; but it is best for every one to be held to the full measure of his moral responsibility, and the blind are no exception to this rule.

Good manners are a part of good morals, and close attention to this subject should be given by teachers of the blind. From the nature of their affliction they can not so well observe faults or merits in the deportment of others, hence more special attention is necessary with blind

children that they may learn to observe the common rules of good manners. Our pupils, when they have finished their course of study, will spend their lives among the seeing, and their success in life will depend upon the patronage of the communities in which they live. It is of the utmost importance then, that they should be so educated that their energy, skill, culture, manners, and character shall recommend them to the respect and esteem of those among whom they live. To accomplish all these purposes for our pupils, teachers of skill and experience are needed. Experience in other schools is valuable for our work in this institution, but experience in our special methods of teaching is very important, that time may not be lost in useless experiments, and that the most efficient service may be performed for the school. We need not only experience in our teachers, but we need aptness in making the best use of experience in improving methods and means of reaching the minds of their pupils.

With the best that teachers can do there will be imperfections, as there are in the education of the seeing. There will be old and obstinate habits to be eradicated, and new ones to be formed. Bad influences must be counteracted, and good influences exerted. Higher and better motives must be presented, and the pupil urged to act upon them. The education of the blind has not yet reached its most efficient point. There is room still for our best efforts and our most untiring zeal.

We bring this forty-third report to a close with expressions of gratitude for the prosperity of the institution and for the increase of its usefulness in reaching a greater number of the blind of the State.

Respectfully submitted,

G. L. SMEAD, *Superintendent.*

STATISTICS OF THE INSTITUTION.

The following chapter is inserted each year, with the necessary additions, for the convenience of those who have not access to a file of our reports. The table presents a summary of the progress of the institution. The statement of expenditures is taken from the reports of the proper officers :

Years.	Expenses	Reports.		Number of pupils.		
		No.	By whom made.	Enrolled the preceding year.	Admitted.	
					Yearly	Total.
1837	\$7,907 51	1	The Trustees	11	11	11
1838	14,103 67	2	The Trustees	20	4	15
1839	13,196 22	3	The Trustees	21	7	22
1840	11,871 16	4	Mr. Chapin	25	6	28
1841	10,155 29	5	Mr. Chapin	50	19	47

REPORT OF THE PHYSICIAN.

To the Board of Trustees :

GENTLEMEN: I take pleasure, hereby, in submitting to your honorable body my report, as Physician, for the year.

The institution has been blessed with good health, with the exception of the month of December, when there were eight cases of typhoid fever among the male pupils. One, a malignant case, was fatal. The institution, since the ventilation of the front basement with windows, is in the best sanitary condition, and considering the feeble constitutions of the blind, their health is above the average.

To Miss Brown, the Matron, I feel thankful for her co-operation in my department.

Dr. C. C. White deserves thanks for gratuitous services as oculist. Many of the pupils have received benefit from his treatment.

Thanking you for your kindness, this is

Respectfully submitted,

J. R. FLOWERS, *Physician.*

REPORT OF THE STEWARD.

To the Board of Trustees :

GENTLEMEN: I herewith present my annual report as steward of the Institution for the Education of the Blind, and respectfully request your consideration and approval of the same.

An accurate account is given of all receipts and expenditures, and a full showing of the condition of each of the appropriations as they remained at the close of the fiscal year ending November 15, A.D. 1879, is made manifest.

The net amount of current expenses is \$31,099.29, and the following is a statement of the expense for the year just closed, to provide for the support of each pupil on an average, and also a *per capita* average of the general household :

Expenses, salaries included, per pupil.....	\$239 08
“ “ excluded, “	179 76
“ “ included, whole household.....	177 51
“ “ excluded, “	133 47
“ wages and salaries excluded, per pupil.....	129 39
“ “ “ whole household	96 07

The average attendance of pupils by which the above computation is made is 173. The officers, teachers, and domestics number about 60. The cost of maintenance of each as thus shown is much lower than any estimate heretofore made in this institution ; as, for instance, the average attendance for the year 1877 was 150, at a cost of \$262.90 *per capita*, and for the year 1878 the average attendance was 156, at a cost of \$259 95 *per capita*, while for the year 1879 the cost *per capita* is but \$239.08, showing a saving over the year 1877 of \$23.82, and over the year 1878 of \$20.87, yet I have not stinted in any particular in the matter of providing for the support of the inmates.

Special attention has been given to the care of buildings and grounds. A number of swings have been provided for out-door amusement during the warm weather, and other amusements suitable for the blind.

At an estimate, my supplies now on hand are as follows :

Groceries and provisions.....	\$500 00
Hay, oats, and corn	125 00
Fuel	400 00
Brooms, broom-corn, and material	350 00
Beads and bead wire.....	40 00

I desire to extend my thanks, and do hereby express them, to the Superintendent, Mr. Smead, and also to my fellow officers, for numerous courtesies shown and valuable co-operation rendered.

I am also grateful to the members of the Board of Trustees for their consideration.

Very respectfully,

JOHN McCARTY,
Steward Institution for Blind.

RECEIPTS AND DISBURSEMENTS OF YEAR ENDING NOVEMBER 15, 1879.

RECEIPTS.

Received from State Treasurer	\$31,000 00	
“ “ counties on account of pupils	48 61

SUGGESTIONS.

To the Parents and Guardians of Blind Children and Youth :

The age at which it is best for children to enter the institution depends very much upon the circumstances of the families to which they belong. If they can be under good influences at home, can have the care of mothers and sisters, can take exercise in the open air, can be taught the use of words, can learn to count, and to perform some of the operations in arithmetic, and commence learning to read, it is unquestionably better for them to remain at home until they are ten, or perhaps twelve years old ; but if they cannot receive proper care, and be taught some of these things, they should come at the age of eight or nine years. Those who enter at this early age need not necessarily attend every year until their pupilage expires. After learning to read, and making a good beginning in other studies, they may spend a year at home now and then, and, by a little aid from their friends, may be constantly improving, or at least be prevented from forgetting what they have learned.

The following are some of the things which may be learned at their homes, as well as after they enter the institution :

1. To count and number, and to add, subtract, multiply, and divide, etc.
2. The multiplication table.
3. To spell common words, beginning with monosyllables.
4. The meaning of common words.
5. The letters in raised print.
6. Items of general information. Every blind child of six or seven years old should know the points of the compass, the name of the town, county, and State in which he lives, the number of counties in the State, and of States in the Union, etc.
7. Facts in geography and history may be added as they can be understood.
8. Hymns, verses of Scripture, and select passages of prose and poetry, which they can understand, should be committed to memory ; these will furnish them subjects of thought when they are alone, of conversation when they are in company.
9. Singing common tunes, or playing some simple instrument.
10. There is no reason why a blind child should not commence attending the district or other school with his seeing brothers and sisters, and take part in the exercises in spelling, mental arithmetic, geography, etc. ; indeed, in every thing except reading.

Blind children can learn every thing which can be taught by conversation, and by giving them an opportunity to examine and handle objects, just as well as those who have sight ; and there is no reason why their education should not be commenced as early as that of seeing children is. Indeed, instead of being neglected because they are blind, they should be taught with more care. During the last ten years, the parents of a number of blind children have written to me, as here requested, and then pursued the course above recommended. The result is that their children enter the institution with as much knowledge and discipline as they could acquire in one or two years of tuition here, and their future progress is much more easy and rapid than that of those who have had no such training at home.

I will furnish a copy of the alphabet, in raised print, to the parents of any blind child who will give me their names and post-office address, and shall take great pleasure in giving any information which they may wish in relation to books or other things pertaining to the instruction of such children at home, or in regard to their admission to the institution. For such information, please address G. L. Smead, Columbus, Ohio.

After pupils have entered the institution, it is important that they should be present every day while they profess to attend. There is but one session in the year. On account of the discomfort and the greater risk of health, etc., to the blind from traveling in winter, it has never been customary to have a vacation or recess at the holidays, and parents are earnestly advised not to encourage their children to think of visiting home at that time. We observe as holidays, Thanksgiving, Christmas, February 22d, and May day. These we endeavor to make as pleasant to the pupils as possible. Between Christmas and New Year the classes go on as at other times, and scholars can not be absent for a week or more then without great loss to themselves, and great inconvenience to teachers; much greater than would be the case with other scholars, because here the instruction is given almost entirely by the teacher, and the scholar who is absent can not make up the missing lessons by studying them from books. The only possible way is for the teacher to sit down and do all the work over again. If this is not done, the pupil must suffer the inconvenience of his loss during the remainder of the term.

It has been our constant aim to secure to our pupils the greatest possible amount of benefit from the limited time allowed them here. For this purpose, after our younger pupils have attended one or two years, they are advised to remain at home a year or more, and, if practicable, to attend school with their seeing brothers and sisters. Many have done this, and, instead of forgetting what they acquired here, have learned half or two-thirds as much as they would have done in our classes. Besides the advantage gained from their greater maturity when they return, and the consequent ability to understand better what is here taught, and to appreciate the valuable opportunities the institution affords, these children learn much by thus associating with other children; the tendency to imitate manners or habits peculiar to the blind is obviated.

The same plan has been pursued by our older pupils, especially those who expect to engage in teaching; and it has been found that by remaining at home a year or more before spending the last year of their pupilage, reviewing and digesting what they have learned, ascertaining their deficiencies, etc., they are able, when they return, to accomplish as much during the last year as they might have done in two, had they not allowed their minds thus to mature.

The blind are, for the most part, to spend their lives among those who have sight. It should be the aim of all who have the oversight of them to render them as much like the seeing as possible. They should be carefully guarded against forming any habits which will be disagreeable to others. The blind are always noticed by strangers, and their manners and habits observed more particularly than those of other persons; hence it is a very great kindness to them to prevent them from acquiring unsightly habits, or to correct them if such have been formed.

Parents should be especially careful to prevent their boys from forming the habit of using tobacco; its influence on all who begin to use it before reaching maturity is especially injurious, but it is even more so to the blind than to most others. Be assured it is no kindness to them to be allowed to form any such habits.

Much effort has been used to make the opportunities here provided known to the adult blind, and to induce them to enter as soon as possible after loss of sight. The importance of beginning, as soon as may be, to labor as blind men, can not easily be over-es-

timated. Every month's delay renders it more difficult for them to learn, and makes them more awkward, to say nothing of the moral influence of idleness, and the feeling of helplessness and dependence which must attend the person who feels that he is doing nothing for himself or others.

It has been customary to encourage our workmen to locate in the neighborhood in which they are acquainted, rather than to look to the institution for employment, or to seek it in large towns. The wisdom of this plan is proved by the experience of every year. A village of a few hundred inhabitants, with the surrounding country population, will usually furnish employment for a broom maker during the year, and the adjacent country will, in most parts of the State, produce all the broom-corn he will need, so that he can obtain his material at very little cost for transportation. For the last twelve or fifteen years hardly an individual of ordinary force of character who has pursued this course, and labored with perseverance and industry, has failed to make a respectable livelihood, while many have succeeded as well as the average of seeing persons.

The experience of many men warrants the statement that any blind man who has energy, and is disposed to be industrious, can in a short time learn to make corn brooms, and become able to support himself. The machinery necessary to carry on this business costs only forty-five dollars. There are now in this State many blind persons who are earning from two hundred to three hundred dollars, or more, each year, instead of being supported in idleness, at a cost to their friends of two hundred to three hundred dollars per year.

ACKNOWLEDGEMENT.

For the following papers and periodicals, sent gratuitously to the institution, the proprietors will please accept the thanks of the officers and pupils:

Weekly Cincinnati Times, Ladies' Repository, Western Christian Advocate, Herald and Presbyter, Religious Telescope (Dayton), Cleveland Herald, Geauga Democrat, Stark County Democrat, Highland News, Ohio Educational Monthly, Christian Standard, Ohio Statesman, Register and Tribune, Christian Press, Medina County Gazette, Democratic Messenger, Findlay Republican, Legal Record, and Columbus Gazette.

The publishers of these papers, and those of others who are willing so to do, will confer a great favor by forwarding their publications during the coming year.

TERMS OF ADMISSION, ETC.

Applications for admission should be addressed to the "Superintendent of the Institution for the Blind, Columbus, Ohio," and should state the name, residence, and post-office of the applicant's parent or guardian, and the supposed cause of blindness. Applicant's must be between the ages of six and twenty-one years. Their time in the institution is regulated by the statute of 1879.

Persons over twenty-one years of age, if free from bad habits, can enter the institution for one year to learn a trade. Persons of this class have an opportunity to hear instructive reading in the evening; they are expected to be present at morning and evening worship, and to attend church on the Sabbath, like other pupils. A man of active mind, and some acquaintance with the use of tools, can learn to make corn brooms in three or four months; some have done it in half that time. Those who have recently lost their sight, and who wish to learn a trade should come here as soon as possible; every month's delay renders it more difficult to learn.

For residents of the State the school is free, no charge being made for board or tuition; but parents and guardians must provide their children with good and suitable clothing, and pay their traveling expenses, and should also deposit with the Steward a small sum for occasional expenses. For pupils residing out of the State the terms are one hundred and twenty dollars per annum, payable half yearly in advance.

The term commences on the second Wednesday of September, and closes the third Wednesday in June. The proper time for admission is at the commencement of the term.

Vacation continues twelve weeks—from the close of the term in June until the second Wednesday in September. Pupils are expected to spend the vacation at home, or with their friends.

When boxes or packages are sent to pupils, a letter should at the same time be sent by mail, stating distinctly how the same is to come, whether by *stage* or *express*, or as *freight*, and what route.

All letters to pupils should have, after the name, this address—

(Blind Asylum),
Columbus, Ohio.
